

# PEARL

All-round three-buckle climbing harness specially designed for women. You don't have to compromise, Pearl respects the specifics of the female figure and guarantees you comfort even when climbing all day. And what the colour...

## DESCRIPTION

Well thought-out design of the waist belt and leg loops, which uses 2 webbings running along the sides of the padding, distributes the load efficiently and ensures greater comfort when sitting or hanging in the harness.

Durable belay loop has a width of 12 mm and a strength of 15 kN.

Reinforced tie-in points are a matter of course.

EVA foam padding is covered on the inner side with a porous 3D fabric and on the upper side with a breathable fabric with high abrasion resistance.

Thanks to Rock&Lock buckles on the legs loops you can put the harness on without having to take your skis or crampons off.

In the back there is a haul loop with a load capacity of 10 kg.

Harness now offers slots for 2 auxiliary plastic PORTER carabiners, into which you can clip additional material.

For quickdraws and other equipment, you have 4 shaped gear loops with textile braiding and a load capacity of 5 kg.

You can easily adjust it using 3 patented stainless steel Rock&Lock buckles.

## KEY FEATURES

- this harness is tailored to women's shapes – it has the specially shaped waist belt, extended belay loop and adjusted waist belt to leg loops size ratio

## STANDARDS

CE 1019  
EN 12277, type C

## FEATURES

UIAA

size M  
365 g / 12.9 oz

3  
YEARS  
guarantee

## MATERIALS

- 45 % PES
- 25 % PAD
- 17 % steel
- 7 % EVA foam
- 6 % PP

## TECHNICAL DATA

Power distribution at the waist belt and leg loops:

## COMPARISON

### PEARL C5083 vs. PEARL C5072

- Different construction - 2 equally wide webbings running along the edges of the padding distribute force more efficiently. Especially on the leg loops, where originally there was one wider strap in the middle, the current design is more comfortable.
- New slots for PORTER plastic auxiliary carabiners.
- Same weight, while increased seating comfort and more durable fabric.
- The new generation does not have the BMI adjustment system on the waist belt.
- 2 elastic bands on the waist belt allow a better attachment of the free end of the tightening strap.

PEARL C5072

## OTHER VIEWS

## MAINTENANCE

Lifetime of this product depends on the frequency and the environment (salt, sand, moisture, chemicals, etc.) in which is used. Without taking wear or mechanical damage into account and in compliance with the conditions specified in the instructions for use this product may be used 15 years from the date of production and 10 years from the date of the first use.

However mechanical damage can occur during the first use, which can limit the lifetime of this products only to its first use.
