

# ↑ SPINEL

A four-buckle climbing harness that you appreciate when you change your waist circumference often, for example when you change layers of clothing. Ideal companion for multi-pitches, mountaineering or winter climbing.

## DESCRIPTION

Well thought-out design of the waist belt and leg loops, which uses 2 webbings running along the sides of the padding, distributes the load efficiently and ensures greater comfort when sitting or hanging in the harness.

Durable belay loop has a width of 12 mm and a strength of 15 kN.

Reinforced tie-in points are a matter of course.

EVA foam padding is covered on the inner side with a porous 3D fabric and on the upper side with a breathable fabric with high abrasion resistance.

Thanks to Rock&Lock buckles on the legs loops you can put the harness on without having to take your skis or crampons off.

In the back there is a haul loop with a load capacity of 10 kg.

Harness also offers slots for 2 auxiliary plastic PORTER carabiners, into which you can clip additional material.

For quickdraws and other equipment, you have 4 shaped gear loops with textile braiding and a load capacity of 5 kg.

4 patented stainless steel Rock&Lock buckles allow you to adjust the harness precisely as you need it.

## KEY FEATURES

- using two buckles on the waist belt you can easily centre it so the gear loops always stay in the optimal position

## STANDARDS

CE 1019  
EN 12277, type C

## FEATURES

UIAA

size M/L  
405 g / 14.3 oz

3  
YEARS  
guarantee

## MATERIALS

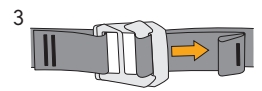

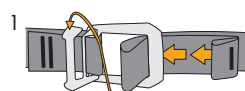

- 44 % PES
- 22 % PAD
- 20 % steel
- 8 % EVA foam
- 6 % PP

Power distribution at the waist belt and leg loops:

## COMPARISON

### SPINEL C5085 vs. SPINEL C5074

- Different construction - 2 equally wide webbings running along the edges of the padding distribute force more efficiently. Especially on the leg loops, where originally there was one wider strap in the middle, the current design is more comfortable.
- In the M/L size, the leg loops have been made smaller. Now from 55 cm.
- Lower weight, while increased seating comfort and more durable fabric.
- The new generation does not have the BMI adjustment system on the waist belt.
- 2 elastic bands on the waist belt allow a better attachment of the free end of the tightening strap.

SPINEL C5074

## OTHER VIEWS

## MAINTENANCE

Lifetime of this product depends on the frequency and the environment (salt, sand, moisture, chemicals, etc.) in which is used. Without taking wear or mechanical damage into account and in compliance with the conditions specified in the instructions for use this product may be used 15 years from the date of production and 10 years from the date of the first use.

However mechanical damage can occur during the first use, which can limit the lifetime of this products only to its first use.

beware of salt

beware of UV

beware of chemicals
