

Intuitive belay device with an enhanced braking feature designed for gym or single pitch sport climbing.

DESCRIPTION

Durable stainless steel braking surface provides longer lifetime and the smooth and secure control for gradual lowering.

Large clipping area for most common carabiner shapes, works best with BORA or OXY carabiner. Compact geometry makes paying out rope even faster and easier, while the handle has a comfortable and firm grip.

KEY FEATURES

Reliable locking geometry provides added level of safety to your belay.

- works best with the BORA or OXY carabiner
- operating is very simple, as it works without any moving parts or lever
