

# FAKIR III

classic

All-round lightweight twelve-point crampons for classic mountaineering. Designed especially for glacier tours and steep snow slopes.

## DESCRIPTION

Asymmetrical shape of crampons ideally adapts to the boot and the front points thus providing maximum efficiency in steep terrain.

Fastening systems suitable for softer trekking boots without a welt.

BOUNCER anti-snow plates included.

Lowered teeth profile provides better stability while keeps traction.

Frame is made of hardened chromoly steel.

Toolfree size adjustment.

Center bar made of flexible stainless steel for better walking comfort.

## FAKIR III vs. FAKIR II

- modified shape for lower weight and improve fatigue strength performance
- 45 g lighter
- 13 mm webbing instead of 16 mm
- new length adjustment system (standard system)
- snow BOUNCERS made of softer plastics for better efficiency and lifetime, rivets used instead of screws
- flex center bar made of stainless spring steel fits better soft trekking boots, makes walking more comfortable and increases fatigue strength of the whole crampon

## FAKIR II

Lifetime of this product is not strictly limited by the manufacturer. Depending on the condition of the product and its history it may be necessary to retire it immediately.

no grinding
