

Extra lightweight and versatile chromoly crampons with replaceable front points. Designed for climbing steep icefalls, difficult mixed routes and mountaineering.

DESCRIPTION

Extra lightweight design alongside with durable chromoly construction.

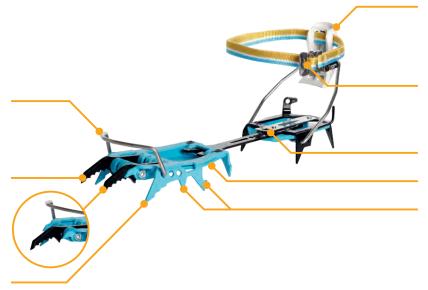

Front toe bail is possible to swap for the SEMI-CLASSIC toe bail for boots with a rim on the heel only and the SKI toe bail for ski touring boots.

Adjustable length of front points.

Modular construction for both mono and dual front points.

Aggressive second teeth provide additional support and extra balance.

Two pairs of front points and BOUNCER anti-snow plates included.

Available with the fastening system for rigid mountaineering boots with a rim.

Patented stainless steel Rock&Lock buckle enables fast and easy fastening and releasing the webbing.

Tool-free length adjustment.

BOUNCER anti-snow plates.

Down facing teeth for stability on ice bulges. Back facing teeth for balance on free standing pillars and columns.

USE

SROVNÁNÍ

LUCIFER III vs. LUCIFER II

- modified shape for lower weight and improve fatigue strength performance
- 65 a lighter
- new length adjustment system (standard system)
- snow BOUNCERS made of softer plastics for better efficiency and lifetime
- adjustable length of front points
- the narrow toe bail fits better to the narrow climbing boots

LUCIFER II / tech
