

QUICKSPIN

Hardened steel ice screw with aluminium hanger. Produced in three different lengths (12 cm, 17 cm and 22 cm) especially for ice climbing. The integrated folding crank makes it easier and faster to screw in during more advanced climbing.

DESCRIPTION

Shaft made of hardened steel for higher strength and durability.

Thin profile of the shaft allows easy screwing even in overfrozen ice [under -10°C].

Four millimeters thick anodized aluminium hanger ensures better grip while screwing with even lower weight.

Produced in 3 length variants L12, L17 and L22. Color-coding facilitates identifying the length of a screw (blue, yellow, gray).

ATTENTION

L12 ice screw do not comply with the strength requirement of EN 568 standard and therefore is not a PPE.

STANDARDS

CE 1019

EN 568?

(only L17 and L22)

MATERIALS

- 90% hardened steel
- 8% aluminium
- 2% polyamid

FEATURES

L12 < 8 kN
L17 > 10 kN
L22 > 10 kN

5 kN

L12 - 115 g
L17 - 135 g
L22 - 160 g

2 YEARS warranty

L12

Four high-quality sharp teeth make gear placement easier.

Anti-corrosion coating of the shaft ensures high resistance against the rust.

Hanger is designed to provide good ergonomics while screwing to ensure easy stacking on the holder and to allow clipping of two carabiners.

The integrated folding crank. Fluted handle for a more secure grip with gloves on.

KEY FEATURES

- strength and durability
- improved ergonomics
- easy start of screwing

Lifetime of the product is not strictly limited by the manufacturer. Depending on the condition of the product and its history it may be necessary to retire it immediately.
