

↑ **BABY RESCUE BAG**

Rescue bag for children evacuation. For children 40–110 cm of height and 25 kg / 50 lb of weight.

DESCRIPTION

Colored loops for the carabiner fixation and adjusting the position of the bag.

Top cover with full zipper and ventilation hole.

Inner padding is very comfortable and fully removable and washable.

Stabilization strap of the top cover to prevent the camber of the cover to the face of the child during the transport by the helicopter.

Side ventilation holes covered by PVC net.

Very durable material with reflection elements.

Safety fixation by 3 belts with velcro and with the safety straps led to cross during the transporting.
